

## **Curetis to Publish its Full-Year 2018 Financial Results on April 11, 2019**

- ***Company to host earnings conference call on same day***

**Amsterdam, the Netherlands, and Holzgerlingen, Germany, April 5, 2019, 09:00 am CET** - Curetis N.V. (the "**Company**" and, together with its subsidiaries, "Curetis"), a developer of next-level molecular diagnostic solutions, today announced that it will publish its full-year 2018 financial results on April 11, 2019. In addition, the Company will host a public earnings conference call and webcast on April 11, 2019, at 03:00 pm CET / 09:00 am EDT to present the financial results of 2018, highlight the most important events in 2018 and provide an outlook for 2019.

The full annual financial report 2018 will be available as of April 11, 2019, at:  
<https://curetis.com/investors/#financial-reports>

For participating in the earnings conference call, please access the presentation at:  
<https://webcasts.egs.com/curetis20190411/no-audio>

To access the call, please dial the following numbers:

###

### **About Curetis**

Curetis N.V.'s (Euronext: CURE) goal is to become a leading provider of innovative solutions for molecular microbiology diagnostics designed to address the global challenge of detecting severe infectious diseases and identifying antibiotic resistances in hospitalized patients.

Curetis' Unyvero System is a versatile, fast and highly automated molecular diagnostic platform for easy-to-use, cartridge-based solutions for the comprehensive and rapid detection

of pathogens and antimicrobial resistance markers in a range of severe infectious disease indications. Results are available within hours, a process that can take days or even weeks if performed with standard diagnostic procedures, thereby facilitating improved patient outcomes, stringent antibiotic stewardship and health-economic benefits. Unyvero in vitro diagnostic (IVD) products are marketed in Europe, the Middle East, Asia and the U.S.

Curetis' wholly owned subsidiary Ares Genetics GmbH is developing next-generation solutions for infectious disease diagnostics and therapeutics. The ARES Technology Platform combines the presumably most comprehensive database worldwide on the genetics of antimicrobial resistances, ARESdb, with advanced bioinformatics and artificial intelligence.
